RAPPORT DÉTAILLÉ SUR DES POINTS CULMINANTS

DETAILED REPORT ON HIGHLIGHTS

Conference on Structure –Embankment Transitions Madrid, 14 March 2007

Under the name “Structure-Embankment Transitions”, the Bridges Technical Committee of the Technical Association of Roads, Spanish National Committee of PIARC, has organised last 14 March in Madrid, a conference to launch their last publication gathering more than 240 professionals.

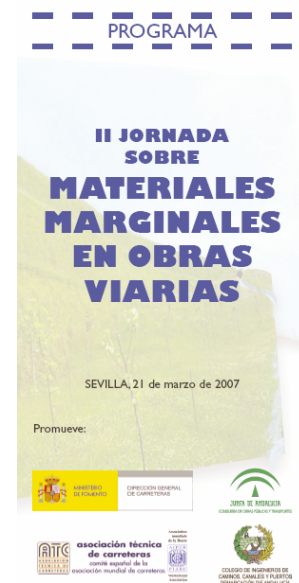

The meaning of these conferences was to offer a meeting and debate forum for exchange of national and international knowledges and experiences about this subject as well as the last innovated actuations implemented. In order to provide a global vision about the problem on lineal infrastructures, many rail sector experts participated in the conference as well.

II Conference on Marginal Materials for Road Works Seville, 21 March 2007

Last 21 March 2007, the Road Geotechnic Technical Committee of the Technical Association of Roads, has gathered in Seville 360 road professionals during the II Conference on Marginal Materials for Roads Works. This edition doubled the assistance estimated so in extremis it has been necessary to habilitate a new conference room with real time transmission.

Following the tradition of previous conference, on this occasion, new techniques and experiences for using marginal materials have been expounded by prestigious experts.

New publications

The Interurban Roads and Interurban Integrated Transport Technical Committee has published recently a book on “The road transversal section: a safety design” where innovated road transversal section designs for safety improvement are technically justified.

Next 30 May, Sandro Rocci, Technical Committee president will launch the new publication on a monographic session which will open to all Spanish technicians.
